Amendment – Kanal 1

Add language to direct the City Administrator to execute specific safety planning.

D. The City Administrator shall present a report to Council no later than September 30, 2027, outlining the City's public health and natural hazards risk reduction plan for the CEI Hub. The City Administrator will present an interim update to Council on progress toward this deadline no later than March 31, 2027.

This report must include, at a minimum, prevention, mitigation, and response measures from the Bureau of Planning and Sustainability, Portland Permitting and Development, Portland Bureau of Emergency Management, and Portland Fire and Rescue, such as:

- Evacuation plans from Linnton and other affected areas of Northwest Portland;
- Evacuation plans from North Portland west of the railroad cut, including at a minimum plans for seismically resilient bridges across the railroad cut;
- A proposal for Industrial Firefighting Capacity that can access the broader CEI Hub / Linnton area without the use of infrastructure which is likely to be unusable in the case of a major natural disaster (e.g. bridges across the Willamette River);
- A proposal for Fire & Rescue capacity for North Portland west of the railroad cut that can access the area without the use of infrastructure likely to be unusable in the case of a major natural disaster (e.g. sufficient capacity for the area at Fire Station 22);
- A proposal for emergency supplies and resources (e.g. BEECN, NETs) needed for all areas that may be affected by various disaster scenarios involving the CEI Hub;
